

TUSHAR

AI-Native Data & Software Analyst

+91 7027009797 | [id.tushar.01@gmail.com](mailto:td.tushar.01@gmail.com) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

BTech Computer Science (AI & ML), Class of 2027, with a strong foundation in SQL, database design, and query performance, built through hands-on work on data-intensive, full-stack systems using Java, Python, and PostgreSQL. Comfortable using modern Gen AI-native tooling (OpenAI API, Anthropic API) as part of the regular development workflow. Solved 300+ DSA problems across LeetCode, Codeforces, and GeeksforGeeks, reflecting strong analytical rigor and structured problem-solving. Known for taking end-to-end ownership of problems — from diagnosing performance issues to shipping live, user-facing systems — with a customer-first mindset.

TECHNICAL SKILLS

Databases & SQL: SQL, PostgreSQL, DBMS, Query Optimization, Indexing, Joins, Schema Design

Data Analysis & AI/ML: Pandas, NumPy, Scikit-Learn, Matplotlib, R, Jupyter Notebook, OpenAI API, Anthropic API

Programming Languages: Java, Python, C++, JavaScript, C

Backend & Frontend: Spring Boot, REST APIs, React, Redux, HTML5, TailwindCSS

Core CS & Tools: Data Structures & Algorithms, OOP, Operating Systems, Computer Networks, Git, GitHub, VS Code, JWT/OAuth

EDUCATION

Chandigarh University, Mohali, Punjab

2023 – 2027

B.E. Computer Science & Engineering (AI & ML)

S.D. Sr. Sec. School, Jhajjar, Haryana

2022 – 2023

Intermediate (CBSE), PCM | 77.8%

St. Francis De Sales School, Jhajjar, Haryana

2019 – 2020

Matriculation (CBSE) | 91.8%

PROJECTS

Credit Card Fraud Detection System

Jul 2024 – Dec 2024

- Built an end-to-end ML pipeline (Logistic Regression, Random Forest) on a highly imbalanced dataset, applying SMOTE-based resampling and feature scaling to improve recall and reduce false negatives.
- Evaluated model performance using precision, recall, F1-score, and confusion matrix — translating raw metrics into a clear model-selection recommendation.
- Built modular, reusable pipeline components for training, evaluation, and benchmarking across multiple classifiers.

Personal AI Knowledge Assistant

Oct 2024 – Dec 2024

GitHub: [s-tushar-01/Knowledge-assistant](#) | Live: [knowledge-assistant-d937.vercel.app](#)

- Built a document ingestion and retrieval pipeline across 4 file formats (PDF, DOCX, TXT, Markdown), covering parsing, chunking, indexing, and retrieval.
- Integrated Gen AI-native tooling — OpenAI and Anthropic APIs — with Server-Sent Events (SSE) for real-time response streaming and secure session-based key handling.
- Designed context-aware, source-cited response generation, mirroring the retrieval-augmented patterns used in modern AI agent platforms.

CampusWire

Jan 2025 – May 2025

GitHub: [s-tushar-01/CAMPUS-WIRE](#) | Live: [campus-wire.vercel.app](#)

- Designed a relational PostgreSQL schema and REST APIs spanning 6 connected entities — profiles, posts, comments, likes, follows, and real-time messaging.
- Implemented JWT authentication, Google OAuth, OTP-based password recovery, and role-based access control across the platform.
- Built an admin dashboard for user moderation, content management, and broadcast notifications on top of the underlying data layer.

Collaborative Code IDE

Aug 2024 – Sep 2024

GitHub: [s-tushar-01/collab-code](#) | Live: [collab-code-ide.vercel.app](#)

- Built a browser-based collaborative coding environment with real-time multi-user editing, shared file management, and in-room chat.
- Implemented real-time synchronization via WebSockets and Yjs, supporting remote cursor tracking and low-latency updates across concurrent sessions.
- Designed role-based access control across 3 permission tiers (host, editor, viewer) for dynamic session management.

CERTIFICATIONS

Structured Query Language — University of Colorado (2024) | **Introduction to Machine Learning** — Duke University (2025) | **AI for Entrepreneurship** — Intel (2024)

ACHIEVEMENTS

- Solved 300+ Data Structures & Algorithms problems across [LeetCode](#) (Rating: 1620), [Codeforces](#) (Rating: 1431), and GeeksforGeeks — spanning graphs, trees, dynamic programming, binary search, and greedy algorithms.
- Participated in KRAFTthink 2025 and GNA Hackathon, contributing to backend-focused problem-solving tracks under time-constrained, team-based environments.
